Profile

Highly skilled Web developer with almost 3 years of experience designing, developing, and managing complex web applications. I have hands-on experience with Web Development, HTML, CSS, JavaScript, TypeScript, React.js, Vue.js, Angular JS, PHP, MongoDB, MySQL, Git, AWS, JIRA, Bootstrap, and Responsive UI designs.

Skills

- Web Development
- Vue.js
- PHP & Restful API
- Postman
- Agile Software Development Lifecycle
- HTML 5
- Angular JS
- MongoDB
- Github
- Bootstrap and Tailwind CSS
- CSS 3
- React.js
- MySQL
- AWS
- Webpack
- JavaScript ES6
- TypeScript
- Docker
- Linux

Professional Experience

Associate Software Development Engineer

May 2021 – Present

Origin Learning Solutions Private Ltd.(Division of ELB Learning)

- As an Associate SDE, I develop high-quality software solutions by writing, debugging, testing, and maintaining code.
- Analyzing complex problems, identifying potential solutions, and implementing effective strategies.
- *Collaborate with other engineers, designers, and product managers.*
- Optimizing the performance by identifying and addressing bottlenecks, inefficiencies, and other performance issues and exploring the latest tools, technologies, and best practices in software development.

Projects

Search App:

- *I built a web application from the ground up using Vue.js and TypeScript to provide optimal speed and user experience.*
- *To improve application performance, I kept up to date with cutting-edge web development trends and technologies like Tailwind CSS and the Vue Composition API.*

Asset Library - Web Application:

- I was involved in PHP development to introduce new functionalities and support the ongoing maintenance of the existing application. This entailed diagnosing and resolving software-related issues, enhancing application performance, and achieving a 40% improvement in load times.

Stock Library:

- Efficiently incorporated third-party APIs and services into the current application in a brief timeframe.
- Initially, there was a process that involved fetching data from an external API and storing it in both MongoDB and Elasticsearch, incurring significant expenses. I undertook the task of integrating a new API, which led to a 60% reduction in costs in a remarkably short timeframe.

Amber Valley:

- Created a Quiz module using React.js and an Admin module to validate the quiz using AngularJS and PHP, actively participating in the development process.
- Making valuable contributions to improve the modules by implementing enhancements and resolving bugs.

Go1 integration:

- Third-party APIs and services were integrated into the fractal application to enable asset access.

Client project:

- I worked on a contract basis for ELB Learning Private Ltd, where I enhanced the API to include functionality for conveniently managing prior subscriptions.
- Initially, I worked with Origin Learning, with whom ELB Learning had a contractual connection. During that time, I concentrated on developing a feature that simplified the renewal of lapsed subscriptions. This not only increased user access via the keeper module, but it also minimized time and storage space in MongoDB and Elasticsearch for new subscriptions, resulting in cost savings.

Awards

- I was honored with the **Individual Best Performer** award on two occasions. (Synergy Awards 2023/ Q2 and 18.06.2021).
- I received the "**Inspiring Role Model**" award twice for my outstanding contributions. (Synergy Awards 2022/ Q1 and Synergy Awards 2022/ Q4)

Education Background

- B.E. in Computer Science and Engineering from St.Joseph's College of Engineering and Technology, Thanjavur, in 2020, securing 72%
- HSC from Baren Bruck Higher Secondary School, Bungalow Surandai, in 2016, securing 86%.
- SSLC from Baren Bruck Higher Secondary School, Bungalow Surandai, in 2014, securing 96%.
