WORK EXPERIENCE

Associate Software Development Engineer Origin Learning Solutions Private Ltd.(Division of ELB Learning)

2022 - Present

Accomplishments

- I built a web application from the ground up using Vue.js and TypeScript to provide optimal speed and user experience.
- To improve application performance, I kept up to date with cutting-edge web development trends and technologies like Tailwind CSS and the Vue Composition API.
- Efficiently incorporated third-party APIs and services into the current application in a brief time frame.
- Initially, there was a process that involved fetching data from an external API and storing it in both MongoDB and Elasticsearch, incurring significant expenses. I undertook the task of integrating a new API, which led to a **80% reduction in costs** in a remarkably short timeframe.
- I was involved in PHP development to introduce new functionalities and support the ongoing maintenance of the existing application. This entailed diagnosing and resolving software-related issues, enhancing application performance, and achieving a **40% improvement in load times**.

Trainee Programmer Origin Learning Solutions Private Ltd.

2021 - 2022

Accomplishments

- Developed a Quiz module using React.js and an Admin module for quiz validation using AngularJS and PHP. Contributed to feature enhancements and bug resolution.
- Integrated third-party APIs and services into the existing application, enhancing overall performance.
- I developed a feature that simplified the renewal process for lapsed subscriptions and minimized the time and storage space required in the database for new subscriptions, resulting in significant cost savings.

EDUCATION

B.E. in Computer Science and Engineering St.Joseph's College of Engineering and Technology, Thanjavur

06/2016 - 05/2020

72%

SKILLS

Web Development

API Integration

React.js

Vue.js

JavaScript ES6

PHP & Restful API

TypeScript

Bootstrap and Tailwind CSS

AWS

MongoDB

MySQL

Front End

Github

PERSONAL PROJECTS

Mobile-Compatible Resume with React JS and Tailwind CSS

- I developed a resume using React JS and deployed it on Netlify.
- The project is designed to be mobile-compatible, utilizing current technologies like Tailwind CSS for a modern and responsive design.
- Tailwind CSS allowed for efficient styling and ensured the resume is visually appealing across different devices and screen sizes.
- <https://infant-franklin-portfolio.netlify.app/>

Netflix Clone with React JS

- I successfully completed a Netflix clone project using React JS with Firebase.
- This project features dynamic user validation, allowing for secure access and interaction. Additionally, I implemented functionality for dynamic banner updates to enhance user engagement and provide personalized content.
- The project also includes the ability for users to add or remove favorites, enhancing the overall user experience and interactivity of the application.

Weather Application with React JS

- I developed a weather application project using React JS.
- The application features a search functionality that allows users to easily search for weather information in different locations.
- The project utilizes React JS for its frontend, providing a responsive and user-friendly interface for accessing weather data.

ACHIEVEMENTS

Synergy Awards 2023/ Q2

Honored with the "Individual Best Performer" award on exceptional contributions and accomplishments.

Synergy Awards 2022/ Q4

Honored with the "Inspiring Role Model" award for exemplifying leadership.

Synergy Awards 2022/ Q1

Honored with the "Inspiring Role Model" award for making a positive impact through outstanding contributions.

Synergy Awards 2021/ Q3

Honored with the "Individual Best Performer" award for my accomplishments.
